

# Society of Life Sciences Nepal

The Society of Life Sciences Nepal (SLSN) was established in January, 2016 to capture and promote the excitement that this generation of scientists is experiencing- the opportunity to provide a scientific foundation for solving urgent problems in science and technology. The SLSN's objective is to provide the platform for exchange of scientific knowledge in all areas of life sciences. It does this through scholarly dissemination of research through its official publications, and various workshops, online trainings and conferences.

Furthermore, SLSN collaborates with scientific organizations to bring a stronger voice in communicating the significance of life sciences to larger scientific community. We create a strong coordination with national and international organizations and institutions to keep them informed about the importance of scientific researches. SLSN keeps the life sciences community informed on government science policies and provides guidance for standards.

The SLSN brings together fields that were once considered disparate, thus supporting the next generation of scientists that are defining entirely new ways of doing science and engineering. SLSN strives to signify a diverse group of academicians, researchers and students by endorsing unity and excellence within the Life Sciences areas by conducting research, seminar, conference and educational programs. In keeping with vision, society also aims to endorse student learning through teamwork, as well as to improve students' knowledge and community alertness. SLSN helps its members develop a strong network of connections with peers, researchers, faculties, staffs and students of different institutions.

We struggle to be number one resource for up-to-date information regarding different scientific programs, info sessions, research programs, and general program information for Life Sciences. Additionally, we also aim to be a better research institute in both dry and wet laboratory.

SLSN's goal is to create and maintain a vital organization to enable life scientists to sustain a broad view of the current cutting-edge developments in life sciences research, education, and industry.

## **Membership:**

SLSN offers three forms of membership:

- 1) General Membership
- 2) Life Time Membership
- 3) Honorary Membership.

Anybody unless declared disqualified by the existing law can become the member by filling up official form. Since SLSN depends mostly on funds raised from its members, a nominal Membership fee is charged which is Rs. 200/ for general member, Rs. 2000/ for Life time members. The membership should be renewed on annual basis. Each renewal costs half the new membership charge.

**The present Working Committee:**

S. N	Name	Designation	Email
1	Anish Rai	Chairperson	anishlamsong@gmail.com
2	Santosh Khanal	Vice-Chair	santoshkhanal007@gmail.com
3	Sunil Pandey	Vice-Chair	pandey_sunil347@gmail.com
4	Uddav Khadka	Secretary	uddav.2048@gmail.com
5	Laxmi Dhungel	Treasurer	ultimategoal@gmail.com
6	Aakriti Khatri	Member	aakriti14326@gmail.com
7	Bikash Rana	Member	bikashrana3@gmail.com
8	Eliza Mahat	Member	elizamahatbhandari@gmail.com
9	Kritima Banjara	Member	kritimabanzu@gmail.com
10	Mahendra Sahani	Member	mahendrasahani_july25@gmail.com
11	Sabina Shrestha	Member	sabinustha@gmail.com
12	Santoshi Sharma	Member	santoc.sharma@gmail.com
13	Thakur Pokharel	Member	khojthakur@gmail.com
